Dear Bruce

I would like to thank you for your assistance and the service you and your team provided for installing the EARS system in my new mechanical workshop. It has now been six months since the installation and it hasn't missed a beat.

The system is a great conversation starter for my visitors and they are very impressed when I demonstrate how quiet the air tools are in operation.

I am confident I am saving a bundle in running costs with the system due to its increased efficiency. I have had to use bigger air tools than I had originally anticipated and your advice in sizing of the compressor has been exceptional.

I have no problems in recommending your company or its system to any customers and am happy to make available my workshop to demonstrate how the system works and its installation appearance.

Yours Sincerely

Robert Palermo
